

A little of care goes a long way. Go through our short list of dos and don'ts, learn how to get the stains out and read how to safely move your furniture. Two minutes well spent guaranteed.

# Do that regularly:

- 1. Keep cushions comfy by plumping firmly from the outside edges after use.
- 2. Turn and rotate the cushions to avoid uneven wear if you've got a favorite snuggle spot.
- 3. To avoid wrinkles, straighten the fabric with your hands from time to time
- 4. Vacuum regularly using the upholstery nozzle to remove dust and avoid fluff and pilling.

### Better don't do that:

- 1. Avoid improper use such as sitting on the back or armrests.
- 2. Never use concentrated detergents or bleach, ammonia, optical brighteners, or soap intended for hard surfaces.
- 3. Do not wash fabrics in laundry machines or dry clean.

# Oops, stain? We got you!

- 1. Soak up spilled liquids immediately with an absorbent napkin or cloth by dabbing gently towards the centre of the stain.
- 2. We do not recommend spot cleaning of individual marks and stains as it damages the fabric and causes color loss.
- 3. Avoid rubbing the material hard.
- 4. If necessary, add a little neutral detergent. Use a hairdryer to avoid watermarks.

If the stain persists, consult a specialist cleaner. If you've spilled something that might leave a stain (like red wine), it's best to ask a professional for help.

# Love changes?

- 1. To avoid damaging the floor, legs and mountings when you move your furniture, make sure you lift it rather than pull or push it.
- 2. When your sofa is larger than a three-seater, divide it into separate two-seater units. That's done, move the compartments to the desired location and merge into the initial set-up (lift them rather than pull or push to avoid damaging the floor, legs, and mountings).
